[HOW TO
BOOK](#)

Date: 1 - 5 June 2026

Location: Esbjerg, Denmark & Stavanger, Norway

Join the **Trade Delegation to Denmark & Norway** with the EIC in partnership with AIA.

Delegates will have the opportunity to participate in organised group meetings with key local stakeholders across the O&G, Hydrogen, Power, and Renewables sectors. These meetings will be complemented by briefing sessions delivered by qualified speakers with in-depth market experience. Additionally, delegates can benefit from attending networking sessions, offering valuable opportunities to build connections and further discussions.

Programme

Group meetings will be organised by EIC and AIA. These will include key players within the industry including representatives from both national and international operators as well as international EPC contractors active in Denmark & Norway. The final programme will be tailored to suit delegates' requirements as closely as possible.

Market Intelligence

Denmark has a strong national commitment to sustainability and net zero targets. EICDataStream currently tracks 16 hydrogen projects worth \$16bn, with nine in feasibility and one on hold (European Energy's Padborg PtX Green Hydrogen). The country also has one cross-border pipeline to Germany, with over \$1bn approved pending 2026 capacity bookings. On the renewables side, Denmark has 33 projects totalling 25GW and \$53bn CAPEX. Offshore wind remains central, with 12 farms in the North and Baltic Seas, complemented by 14 solar projects. A robust grid system supports integration, while Danish companies such as Ørsted and Vestas export expertise globally. Over \$1 billion in investment has been approved, but consumers must book capacity in 2026 for the project to progress. H2 Energy is developing a 1GW green hydrogen plant in Esbjerg which will see approximately 100,00tpa of green hydrogen produced once operational. The project received a building permit in June 2024.

Norway has 19 hydrogen projects worth \$4.3bn, 11 in feasibility and two under construction (Hydrogen Hub Agder and Bodø Green Hydrogen, both 20MW). A final investment decision was taken in 2025 for Norwegian Hydrogen's 25MW Rjukan project, backed by the European Hydrogen Bank. Green hydrogen development leverages Norway's wind and hydropower resources. The country remains a stable O&G producer and leading exporter, with 61% of exports coming from energy in 2024. It plays a key role in Europe's supply security after the Russian shortfall and ranks 9th globally for CAPEX spend to 2030, estimated in US\$43bn, \$15bn is destined for projects that have already been sanctioned, and the remainder \$27bn, with projects pending FID.

US\$69bn

Denmark's CAPEX in
Hydrogen and Renewables
