

The Montrose field comprising three locations (Safe Boreas, Montrose-A and Noble Regina Allen) completed a full field muster of 800 people in under 15 minutes last night thanks to the EPIC POB system. We routinely achieve this at every muster, but it struck me as significant that so many people could be mustered with such efficiency.

Vessel Manager, Prosafe

The EPIC system allowed for automatic personnel tracking during W2W operations across two locations. This helped significantly reduce the POB administration and mustering times and provided real time updates on POB limits and location. Smart-Trac is the way forward and we recommend the EPIC system to all offshore platforms.

W2W Superintendent, Dana Petroleum

Working with EPIC and the Smart-Trac System has had an immediate and real impact in driving an enhanced safety culture on board. Having reliable and accurate information readily at hand allows for highly efficient mustering.

CEO, Bibby Marine Services

Every offshore location needs an electronic POB, mustering & evacuation system

With an EPIC system you can rapidly identify missing personnel, manage emergency evacuation logistics, create lifeboat manifests and keep track of all persons on board. Our system is proven in reducing downtime whilst increasing crew safety and welfare.

‘Plan for the worst, expect the best’

www.epicpob.com

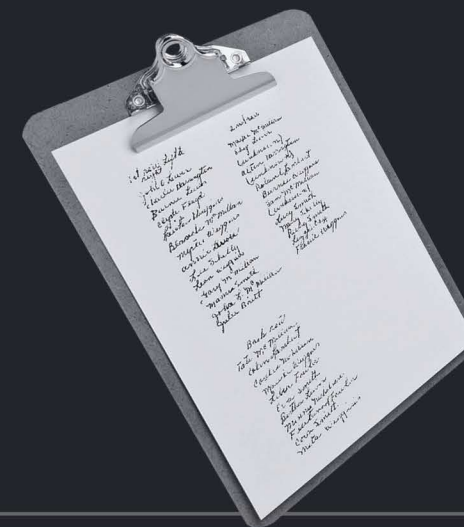

We currently manage over 50 live installations worldwide, with a typical POB of 250 per site. With an EPIC system clients routinely achieve a full muster in under 8 minutes.

With over 20 years of industry operations EPIC are a leading provider of POB Management, eMustering and Evacuation Systems.

EPIC operate worldwide, working with large companies to standardize their POB management across their multiple assets.

In the real world,
what are the real benefits?

Manual

Smart-Trac™

High risk of error, takes a long time to correlate, takes focus away from the emergency

'T cards' cannot capture people mustering at alternative locations

Slow and potentially inaccurate. Cannot share information with other locations / authorities

Cannot manage dynamic evacuation situations

Difficult to communicate to third parties

No online visibility

Muster at any location – RFID card at reader. No verbal communication / no mental arithmetic, no stress

Rapid identification of missing personnel (Rapid mustering saves operational time)

System provides 100% accurate information to emergency response organisations in "real-time"

Allows personnel to muster at any point

Immediate evacuation status reporting

Onshore visibility of who's missing

... confusion

... efficiency
