Date: 24 - 26 June, 2026

Location: Beijing, China

Join the **UK Pavilion at Beijing Energy Congress 2026** to secure a prime stand location, enhanced promotion and visibility as well as access to industry experts through our extensive networking opportunities.

Beijing Energy Congress will bring together policymakers, investors, and global energy leaders for impactful discussions and strategic partnerships. At its heart, a dynamic exhibition will feature innovative products, breakthrough technologies, and scalable solutions, connecting trailblazers with key decision-makers driving real-world energy transformation.

Join us and be a part of the experience!

Market Intelligence

The oil and gas market in China continue to advance, with an estimated US\$168.15 billion in investment projected for projects expected to commence operations by 2031, across 112 projects. The downstream sector leads with US\$142.25 billion with 57 projects, followed by the upstream sector with US\$13.90 billion in CAPEX across 38 projects and the midstream sector with US\$11.97 billion in CAPEX for 17 projects.

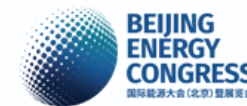

The National Energy Law which came into effect in January 2025 has encouraged the large-scale development of unconventional oil and gas resources including tight oil and gas, shale oil and coalbed methane (CBM) underlining China's commitment to energy security. Policies such as the "14th Five-Year Plan" and "Made in China 2025" are steering the country toward a more resilient, technology-driven and cleaner energy future while maintaining oil and gas as a source to ensure the energy security in China.
