SERVICES

RENEWABLE ENERGY - WIND

# WE REALLY KNOW OUR STUFF.

At British Engineering Services, we really know our stuff. For over 150 years, our highly skilled engineer surveyors and engineering consultants have inspected, tested and reported on industrial machinery in order to keep industry, businesses and the public safe. We're all about the highest quality assessments, rigorous inspection and detailed reporting, with no compromise, ever.

## LEAVE NOTHING TO CHANCE

With experience spanning across many sectors, everything we do has been tried and tested. Our involvement in the renewables sector is no exception and we're more than capable when it comes to your wind power operations. Our credentials are impressive and we're proud to work with some of the most influential renewable energy focused organisations.

Our team of engineer surveyors are undoubtedly the best at what they do. Having gone through the most rigorous training, they're technical specialists when it comes to your machinery and safety equipment. Whether your operations are onshore, offshore or both, with a dedicated team of wind turbine experts, we've got it covered.

And we're experts when it comes to your specialist projects too. We're delighted to have worked with the world's largest floating offshore wind turbine technology, playing a vital role in keeping things operational, legally compliant and, above all else, safe.

Our in-depth sector experience means we understand your requirements. Working in partnership with you, we'll provide an efficient inspection schedule that's tailored around the generation availability of your operation. In some cases, we can even use the latest technology, such as drones, to reduce downtime even further. We always keep disruption to a minimum and make sure you have full transparency of your future inspections so that you always know when to expect us.

We'll stay on top of the regulations, so that you don't have to. Our technical specialists know everything there is to know when it comes to the relevant legislation including:

- ✓ Lifting Operations and Lifting Equipment Regulations 1998 (LOLER)
- ✓ Pressure Systems Safety Regulations 2000 (PSSR)
- ✓ Provision and Use of Work Equipment Regulations 1998 (PUWER)
- ✓ Any local, applicable legislation

Our end to end service supports the complete life cycle of your operation.

From guidance and support during design, factory acceptance testing and commissioning examinations, through to Statutory inspection and Non-Destructive Testing while in service, we're on hand every step of the way.

Our services include:

- ✓ Inspection and Written Schemes of Examination
- ✓ Non-Destructive testing
- ✓ OEM data and analytics services
- ✓ Insurance risk management
- ✓ Electrical Inspection & Testing
- ✓ Blade Inspection
- ✓ Commissioning Inspection
- ✓ Overload testing lifting equipment
- ✓ In service monitoring

With British Engineering Services you'll get all the benefits of working with an independent company focused entirely on managing your risk, and the skills and expertise of an industry leading team.
