Date: 27-28 Sep 2023

Location: Messe Bremen, Germany

Join the UK Pavilion at **Hydrogen Technology Expo Europe 2023** to secure a prime location, enhanced promotion and visibility as well as access to industry experts through our extensive EIC's and DIT's network.

This must-attend event will bring together the entire supply chain to discuss everything from technologies and solutions for low-carbon hydrogen production, efficient storage, transport and infrastructure, as well as advanced design, testing and development, manufacturing solutions and advanced materials for hydrogen fuel cells.

More than 185 international speakers and over 7,500 attendees will come together to discuss, and see, the latest technologies and engineering solutions, advanced materials, manufacturing equipment, infrastructure, as well as test and evaluation tools and services to finally commercialize hydrogen as a mainstream provider of clean, renewable energy. PLUS – see more than 450 exhibiting companies in the main exhibition hall.

Market Intelligence

The European Commission (EC) set hydrogen at the core of the European Union's green recovery with the launch of its hydrogen strategy in July 2020, calling for calls for 2x40GW of electrolyser capacity to be installed by 2030, 40GW within the EU and another 40GW in Europe's neighbourhood with export to the EU. In parallel to the wider EU Hydrogen strategy, many EU member countries, including the Netherlands and Germany have published a hydrogen strategy /roadmap. These countries have announced multi-billion investments in hydrogen.

There are currently 135 hydrogen production projects in various stages of planning and development set to come online in Europe by 2030, with an estimated CAPEX value of over USD\$65 billion. Ninety percent of these projects are green hydrogen projects that have a cumulative capacity of close to 32GW. Netherlands and Germany are in the lead in terms of the number of projects in the pipeline with 32 (CAPEX: USD\$8.1 billion) and 24 projects (CAPEX: USD\$ 8.3 billion) respectively. Other Key markets in Europe include Spain, Denmark, Norway, France, and Austria. Besides hydrogen production, there has also been increasing interest in the development of hydrogen transport pipelines across the region.

Stand package includes:

- ⦿ All above listed benefits
- ⦿ Back & side hard walls
- ⦿ Fascia name board
- ⦿ Lighting + 1 power outlet
- ⦿ 1 round table & 3 chairs
- ⦿ 1 lockable counter with logo
- ⦿ Literature rack
- ⦿ Wastepaper basket
- ⦿ Access to UK Lounge
- ⦿ Project Management
