Market Intelligence

Malaysia remains a strategic hub for Southeast Asia's energy sector, supported by its mature and evolving oil and gas industry. Its advantageous location and dynamic energy landscape continue to attract global interest, highlighted by the launch of Malaysia Bid Round 2025, which has drawn strong participation from leading international companies.

Across APAC, the oil and gas market is expanding, with investments projected to reach \$899 billion. Upcoming licensing rounds in Malaysia, Indonesia, and Brunei are set to stimulate exploration and future field development, while rising natural gas demand—driven in part by growing electricity needs from data centre expansion—is accelerating midstream infrastructure development across the region.

At the same time, APAC's energy transition is gaining momentum. Offshore wind capacity is expected to grow by around 100 GW by 2035, led by markets such as China, South Korea, Taiwan, Vietnam, and Japan, with Australia emerging as a long-term player. Carbon capture is also advancing, led by Australia and supported by growing initiatives in Indonesia, Malaysia, and China, reflecting its critical role in decarbonising APAC's coal-reliant energy systems.
