

EIC INTERNATIONAL PAVILION

OFFSHORE EUROPE 2027

7 -9 September 2027 | Aberdeen, UK

EVENT DETAILS

Join the EIC Pavilion at SPE Offshore Europe (OE) 2027 to secure a prime stand location, enhanced promotion and visibility as well as access to industry experts through our extensive networking opportunities.

SPE Offshore Europe brings together new and innovative ways to move the upstream industry forward. This is the platform to grow your network, expand your technological knowledge, and boost your brand exposure amongst the offshore energy industry. In joining the EIC Pavilion you will benefit from the bridging of ideas across networks, and gain the skills to keep your business competitive moving into the future.

SPE Offshore Europe is the energy industry's platform for navigating towards a better energy future. This event will create a space for collaboration and learning in order to drive the oil and gas sector forward, bringing together the entire energy value chain back to business, face to face.

Join us and be a part of the experience!

MARKET INTELLIGENCE

The European upstream O&G industry is navigating a critical juncture as it tries to maintain momentum in exploration and production, presenting opportunities amid uncertain scenarios concerning energy security and supply. Operators are increasingly advancing in search for decarbonisation technologies and practices to provide both a reliable and sustainable source of energy. The E&P sector, centred in Norway, especially in the Barents Sea, Norwegian Sea, and the North Sea, continues to face activities to enhance the country's production capability. Amidst a fiscal and regulatory adverse scenario, the industry in the UK has M&A activity growing, promoting the creation of substantial producers. In terms of final investment decision (FID) numbers, it is anticipated that 27 projects will reach sanction over the next two years (2025-2027).

The region intensifies its focus on energy independence with carbon neutrality to hit its net zero target. Hence, the offshore upstream sector will play a pivotal role in the energy transition, driving economic growth and serving as a reliable source of energy through the coming decades.
