HOW TO  
BOOK

**Date: 6 - 8 March 2024**

**Location: Kaohsiung Exhibition Centre , Taiwan**

Join the **UK Pavilion at WIND ENERGY ASIA 2024**: Taiwan's wind energy has been ongoing for nearly 20 years, starting with onshore turbines to currently more offshore. At the end of 2021, there were 396 onshore and offshore wind turbines in Taiwan. In the next 10 years starting from 2023, Taiwan will start the replacement of onshore wind turbines: there will be at least 900 blades that need to be recycled.

Join us at the only B2B trading platform dedicated exclusively to the wind energy industry in Taiwan. Meet the major buyers and suppliers from Taiwan and overseas.

# Market Intelligence

Asia Pacific, known for its heavy reliance on fossil fuels, is now strongly venturing into low-carbon and zero-carbon energy sources on the way to a net zero target across key countries. Across the region, significant renewable energy targets being set. Taiwan in particular is looking to fast track its renewables growth with a target of 27-30% by 2030. Offshore wind is expected to be a key driver, with a target set for 40GW by 2050 - and half that amount is on track to be commissioned by 2035.

The country has a fixed and floating offshore wind pipeline of over 40GW underway on EICDataStream, and is the most advanced country in the region (excluding China) for development, with around 4.8GW under construction. Taiwan is focused on continuous growth, with 10 projects in December selected in the latest round 3 auction for 2027 commissioning. But with more auctions are already expected for the rest of the decade, it is evident that a plethora of long-lasting opportunities are available for the supply chain to explore.

BOOK

## Benefits of Participating on the UK Pavilion

Prime location

Enhanced promotion

Appointed EIC freight partner & stand designer

High visibility presence

Access to industry experts

VIP visitors and pavilion tours

Dedicated project manager

Help to identify potential partners & customer

Country overviews/  
project data presentation

Company profile in the UK group brochure
