# Hydrogen Infrastructure Breakfast

*Building Europe's Hydrogen Network*

22nd October, 07:30 (CEST)  
Hamburg, Germany

**#JoinUs**

# About

Hydrogen is becoming a cornerstone of Europe's strategy to decarbonise industry, secure energy independence, and integrate renewable power. Europe stands in a prime position to become a global leader in hydrogen, thanks to its cross-border network vision and strong industrial demand. However, delays in execution could risk Europe losing its leadership. The achievement of 14 projects reaching FID across Europe in 2025 highlights the urgency: these projects must be delivered for Europe to stay at the forefront of the hydrogen transition.

Join us at the Hydrogen Infrastructure Breakfast, on the 22<sup>nd</sup> of October in Hamburg, Germany, to explore the future of hydrogen infrastructure, and discuss how Europe's hydrogen networks are evolving.

# Agenda

07:30	Registration & Networking Breakfast	
07:55	Welcome & Market Intelligence Update	Claas Helmke, Director Continental Europe, Energy Industries Council
08:10	Project Update	Joe Seifert, Chief Executive Officer, EET Hydrogen
