## WHO WE ARE...

Alpha Safety is a premier industry provider of highly engineered, technical products and services essential to the nuclear industry.

Our extensive range of offerings support critical end markets worldwide.

We bring over 200 years of combined nuclear experience supporting mission-critical environmental cleanup and remediation projects, national security initiatives, and clean energy programs.

**Alpha Safety's unique blend of products and services help support a cleaner and safer world for generations to come**

## OUR MISSION

Commitment to delivering safe, sustainable, and quality solutions to every aspect of the nuclear industry including environmental cleanup, national security initiatives, and clean energy programs

## OUR OFFERS...

- Highly specialized engineering containers for handling and storage of nuclear materials such as plutonium and uranium
- Proprietary filter technology to release flammable gases during the handling and transportation of radioactive materials
- Specialty containers and components for contact handled and remote handled radioactive materials
- Identification and characterisation of radioactive materials through Non-Destructive Assay (NDA) instrumentation
- Applied engineered safety systems to confine, contain and control radioactive and hazardous materials
