

UK PAVILION

EUROPE ENERGY WEEK 2027

5 - 8 April 2027 | Hannover, Germany

**EUROPE
ENERGY WEEK**

EVENT DETAILS

Join the UK Pavilion at Europe Energy Week 2027 to secure a prime stand location, enhanced promotion and visibility as well as access to industry experts through our extensive networking opportunities.

Europe Energy Week is a new international energy exhibition and conference, bringing together the full energy value chain, from natural gas and LNG to renewables, low-carbon solutions, grids, energy storage, nuclear, AI and digital technologies. Co-located with Hannover Messe, the event connects energy producers, technology providers, investors and industrial energy users, creating opportunities to discover new solutions, gain industry insights, build partnerships and develop new business opportunities across Europe's energy market.

Join us and be a part of the experience!

MARKET INTELLIGENCE

Europe currently has over 4,900 energy projects under development across a diverse range of sectors and markets. Should all of these projects proceed as planned, they would represent a significant investment opportunity, with a combined CAPEX of \$3.63 trillion.

The cleantech sector accounts for over 85% of projects currently under development, spanning renewables, clean fuels, hydrogen, carbon capture and nuclear. Together, these projects represent more than \$3.2 trillion in potential CAPEX, highlighting the scale of investment being directed towards Europe's energy transition.

Oil and gas activity remains present across the region, although at a more limited scale compared with other energy sectors. Current developments are largely driven by projects in Norway, while markets such as Cyprus are also beginning to see new projects move forward.
