BOOK](#)

Date: 21 - 24 September 2026

Location: Rio de Janeiro, Brazil

Join the **UK Pavilion at ROG.e 2026** to secure a prime stand location, enhanced promotion and visibility as well as access to industry experts through our extensive networking opportunities.

ROG.e stands out as the premier business platform and knowledge hub for the Oil and Gas sector in Latin America. Pioneering new energy trajectories, the event opens doors to a realm of possibilities. We extend an invitation to join us at this year's exhibition where together, we can envision a promising future.

Join us and be a part of the experience!

# Market Intelligence

One of the world's leading energy producers, Brazil has a considerable pipeline projects across the oil and gas and clean energy markets. EICDataStream is now tracking more than 1,000 projects in the country, with a potential CAPEX exceeding US\$1 trillion. The O&G sector in Brazil continues to expand, with E&P activities gaining particular momentum. Petrobras alone aims to reach approximately 3.2 million barrels of oil equivalent per day by 2029, a significant increase compared to the current average production of 2.7 million in 2024. Furthermore, over US\$130 billion in offshore investments are expected by 2030, with 15 new FPSOs scheduled to come into operation during this period. IOCs and independent players such as Equinor, TotalEnergies, Shell, Trident and PRIO are also making progress with ambitious field development projects in the Santos basin and beyond.

While oil and gas remains a driving force in the Brazilian energy market, the country has also attracted strong interest by developers in the clean energy area. A country already known for its vast onshore wind and solar potential, Brazil has also been pursuing offshore wind in recent years. Up until now, international and domestic developers have submitted a total of 104 projects for environmental evaluation, totalling 247GW of planned capacity. Clean hydrogen is another exciting clean energy segment, with key players such as Fortescue, Qair and Solatio announcing major green hydrogen and ammonia projects in strategic industrial hubs such as Pecém, Açú and Suape.

# EIC Membership

The EIC is the world's largest, energy-agnostic trade association, supporting companies that supply goods and services to the world's energy industries. EIC helps its members to export, diversify and grow through its network of international offices, where our teams gather intelligence on worldwide projects, organise business events and provide regional support to members.

## Exclusive Benefits
