- Company data sourced from EICSupplyMap, with companies listed at UK Companies House
- Data includes revenues from 3,300 companies, out of a total 3,700 listed in SupplyMap
- Revenue data is correct for years 2017-2021. 2022 onwards not yet available. 9% of GDP is based on the average of the 5 years (£211bn)
- All job data is sourced from LinkedIn
- It is recognised that not all of the revenues/staff are linked directly to energy-related work/markets, as many companies are diversified into other sectors like infrastructure, defence, marine, etc
- EICSupplyMap is a live database, managed and maintained by EIC staff, and its data and insights will therefore change over time
